Work Experience

CipherTrace Software Engineer

June 2019 – May 2020

javascript, ionic5, angular, html5, css3, product design

Designed and developed a mobile scout application that communicates to private backend services via API to help investigators perform investigations of blockchain addresses and transactions across a number of different crypto currencies. The mobile app called CipherTrace was successfully released to Google Play, App Store, as well as a PWA version.

api.metals.live Software Engineer

May 2019 – Present

javascript, nodejs, mongodb

The public API server for real time precious metals rates — gold, silver, platinum and palladium and other commodity metals.

SugarCRM Senior Software Engineer

February 2018 – May 2019

javascript, handlebars, html5, css3, less, living styleguide

Architected SugarCRM Multiverse [Living] Styleguide that provides a baseline design language, CSS rulesets for layouts and components that can be consumed by microservices. This type of styleguide does not define code structures or naming conventions making it very easy to inherit look and feel of base SugarCRM by any framework without having to touch any HTML markup. Worked closely with the design team to implement new features into production. Filed 14 UX-centric patents.

SugarCRM Senior UI/UX / Front-end Engineer

March 2012 – February 2018

javascript, jquery, handlebars, html5, css3, less, styleguide, usability testing, rapid prototyping

Hired to completely redesign the app 6.x into all new 7.x. Took charge of building styleguide from scratch. Built living styleguide. Was in charge of front-end bug fixes. Performed a number of usability tests and A/B tests in annual SugarCON UI/UX lab. Took charge of performing a number of code changes to localize SugarCRM app to RTL languages. Rapid prototype developer.

slashdot.org User Experience Engineer

July 2010 – March 2012

perl, html5, css3, javascript, jquery, styleguide

Led redesign of slashdot.org to HTML5/CSS3. Conducted a number of A/B tests and developed new front-end user experience. Took responsibility of developing some back end components of slashdot.org. Maintained styleguide of slashdot.org.

sf.net UI Engineer

December 2009 – July 2010

`python, mongodb, html5, css3, javascript, jquery, usability testing, uiux`

Led front-end UX development of sf.net downloads section. Evolved UX based on usability testing.

slashdot.org UI Engineer

April 2008 – December 2009

`html5, css3, javascript, jquery, uiux`

Supported engineering team and moved all legacy markup to HTML5/CSS3, significantly improved user experience, cross-browser support and performance.

DareMightyThings.com Web Product Developer

May 2004 – January 2009

`php, mysql, javascript, jquery, html, css, drupal, revize cms, bash, awstats, sys admin`

Designed and developed web portal for National Guard Youth ChalleNGe Program. Developed intranet, state local websites with staging and production locations for web editors.

Supported and trained web editors onsite and online. Delivered annual in-class training to web editors. Provided custom programmatic solutions to integrate third party software into product. Developed internal technical assistance ticket and tracking system. Developed enhanced front-end representation for awstats logging system. Performed some system administration duties.

NHBis.com Web Developer

2005

`php, asp, html, css, jquery, adobe photoshop, seo`

Designed website mockups in Photoshop. Implemented fully functional website solutions from mockups. Created customized website solution for clients, such as shopping carts, catalogues and online order forms. Took charge of SEO efforts for clients.

B2B2B.com Graphic Designer

2004 – 2005

`adobe illustrator, adobe photoshop`

Designed banners, leaflets, posters, political yard signs and other offline print advertisement artwork.

AlidaConnection.com Web Designer

October 2001 – July 2004

`php, asp, javascript, html, css, macromedia flash, adobe photoshop, adobe illustrator`

Designed website mockups in Photoshop. Implemented fully functional website solutions from mockups. Created customized website solution for clients, such as shopping carts, catalogues, online order forms and promotional campaigns. Designed animated ad banners. Designed advertisement artwork for offline marketing campaigns.

pulse.ua Web Designer

February 2000 – July 2001

`php, jquery, html, css, flash, swift3d`

In charge of corporate web properties. Designed online web advertising campaigns. Designed interactive Flash advertising campaigns and websites.

Part-time and consultations

zicasso.com User Experience Consultant

March 2012 – October 2012

php, js, jquery, html5, css3, drupal

Moved all front-end markup from legacy to modern HTML5/CSS3. Worked on improving user experience and performance.

dodstarbase.org Web Product Developer

February 2008 – November 2008

php, mysql, js, jquery, drupal

Developed custom solution in php for intranet. Created internal messenger system.

totalpermit.com Web Product Developer

September 2007 – May 2011

php, mysql, html, css, drupal
