TRUE360[®] reports are engineered to identify prior repairs or existing cosmetic damage to exterior body p structural inspection for vehicles that have, or have not reported accident history. In addition, when structur identified as previously repaired, we will document these areas in an easy to read photo identified exclar modifications or damage to this vehicle that occur after the inspection date will not be reflected in this repo the vehicle's cosmetic and topside structural condition as of the inspection date listed on the report. This F evaluation of the vehicle's underbody structural, mechanical or interior condition and in no way guarantees t that all prior repairs or existing damage will be identified.

Structural Inspection

True360 Structural inspection checks the following components for any evidence of structural damage. Structural damage is commonly found in welds that have been torn, separated, or re-welded, as well as body / fiberglass filler, physical damage, or areas of previous repair in relation to the inner / outer pillars. Please be aware, this report only determines if any damage has occurred and does not pass judgement on severity of damage or degree of repair.

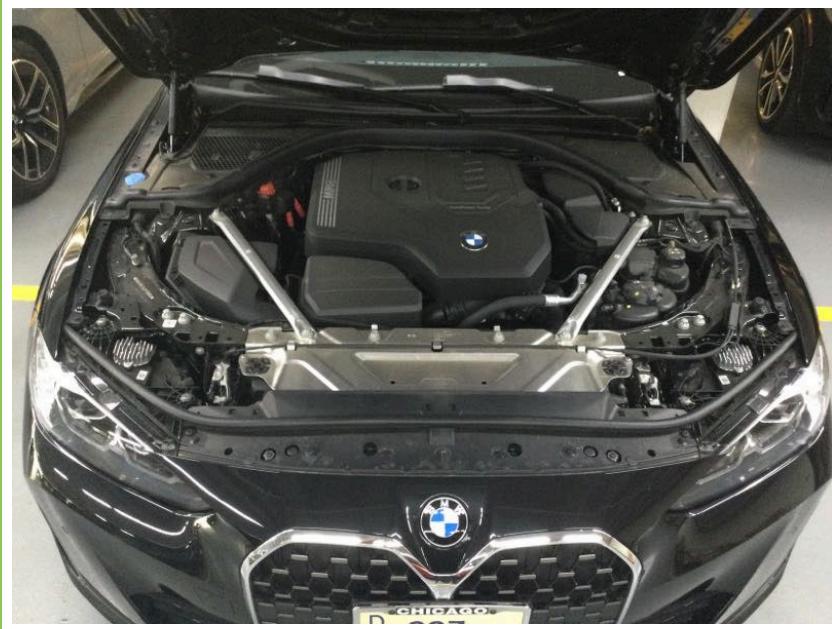

Engine Bay Underhood (Structural)
